

# *Improve your preparative separation*

*Large capacity column oven  
for preparative purposes*

*Collect mg quantities at up  
to 100,000 plates*

*Dedicated large capacity  
preheater (up to 25 ml/min)*

*Dedicated postcooler*

*Superior  
temperature control*

**Polaratherm™**  
**Series 9020**  
**SEMI PREP**

The Polaratherm Series 9020 Semi Prep system is designed to increase the performance of your (semi-)prep separations. High quantities of your product can be collected with increased chromatographic efficiency and high resolution.
